

CERTIFICATE OF QUALIFICATION

awarded to

Eckert & Ziegler EUROTOPE GMBH
Berlin

This is to certify that the
Radiopharmaceutical Synthesis Device

Modular-Lab

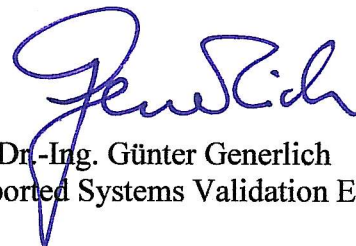

meets the requirements for a qualified system, including, but not limited to, specifications, development, qualification testing, resolution of deviations, tracing of tests to systems specification, and organisation and completeness of documentation.

On this basis and on the basis of the detailed audit report accompanied by the extensive documentation list the Modular Lab is considered qualified and acceptable for research and production use.

The qualification will be maintained under the conditions, that

- all changes to any configuration items of the systems are appropriately prepared, tested, reviewed and documented, and
- the system will be periodically reviewed.

Freiburg, 24. November 2007

Dr.-Ing. Günter Generlich
IT supported Systems Validation Expert
